Staff News

Celebrate!

Robin Saunders celebrated her 25 years of service with the City of Salem/Library in May. Congratulations Robin!

Looking for our newest team members

Recruitments for three vacant Library positions were opened in Mid-May and closed May 29. Interviews for these positions will take place in June.

The High School Library Aide I recruitment took place over the month of May. Out of the 48 applicants who applied, 10 Library Aide I staff will be hired and begin the second week of July. Library Aide I staff help with processing returns and shelving. They work about 12 hours a week.

The college Intern recruitment will open this week. Library Interns gain valuable customer service experience in a library/government setting during their 6-month term.

Library Spaces

It's time to start preparing to move

Be aware that starting in November, the Library will no longer be booking our event spaces in the Library as we finalize packing and moving details to make way for the construction crews.

Collections

Showing and sharing our work

During the month of May 2019, staff tracked all collection maintenance decisions and created a report to highlight the output from the tracking. See the "Collection Maintenance Tracking Report" for more detailed information.

Events

May Events

Fun things are always happening at the Library!

May the Fourth Be With You, Saturday, May 4 - hundreds of people attended an all-ages celebration of all things Star Wars at the library, which included the Cloud City Garrison in full costume, photo opportunities, a (really challenging!) scavenger hunt, crafts and Star Wars Lego fun.

Explore Earth Exhibit Open House on Saturday, May 25 was a success! Nearly 70 people of all ages interacted with the exhibit during the open house hour. All but one of the 24 attendees who completed a program evaluation found the Exhibit interesting and would recommend the exhibit to others. Also, Library staff noticed that patrons spent time interacting with the exhibit, throughout the weekend, with adults pointing out interesting facts to their children. The Explore Exhibit will be available all summer for visitors to enjoy, thanks to the NASA @ My Library and the Space Science Institute.

Discovery Room - "Down on the Farm" closed Friday, May 24. Mary Beth Hustoles and her helpers are busy preparing "Universe of Discovery through the end of May. The new exhibit debuts Tuesday, June 4 as part of "A Universe of Stories" Summer Reading Club.

Storytime Break - storytimes were on hiatus the last two weeks of May while Youth Services staff made last minute preparations for the annual summer reading club, "A Universe of Stories".

School Visits Galore - The Library hosted class visits from several elementary schools during May, as teachers and Library staff encouraged students to discover all the Library has to offer, and to join the Summer Reading Club. Students learned about the Library through stories, scavenger hunts and sneak peeks at Summer Reading prizes.

General Library News

Library as Community Forum

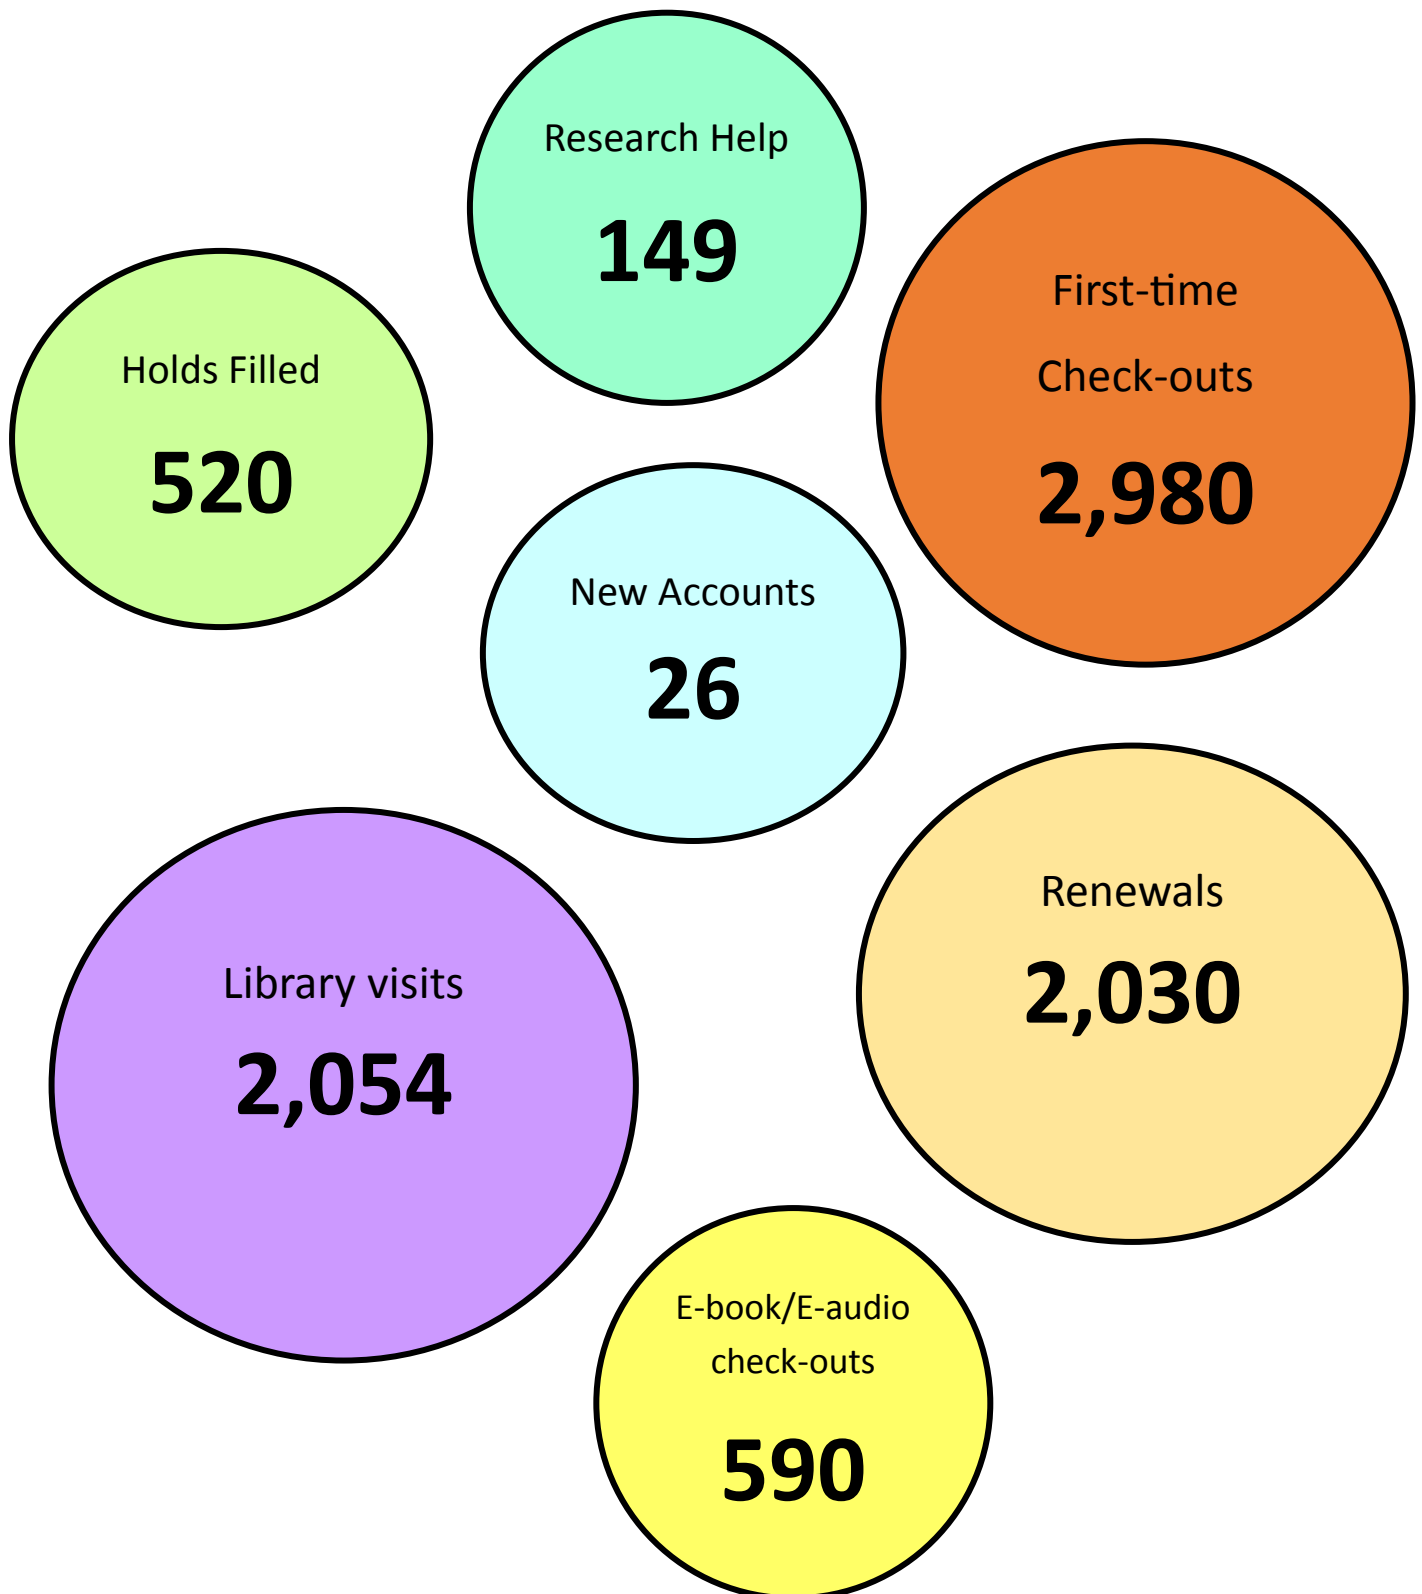

There was some controversy in May over a private group that booked the Library's meeting room. This group, Free Speech NW, had invited speakers that many in the community objected to speaking in Salem. Despite the challenges, security and library staff worked together with close support from Salem Police department. Everyone stayed safe and patrons were still able to use the library as normal during the day.

Measuring our impact

Through the SurveyStance kiosk, users reported an 85.4% satisfaction rating with the service they received during the month of May. This is the highest percentage of satisfaction reported, during the last 4 months of surveys. Excellent work, public services team!

Included in this month's report is "A Day In The Library". It contains some facts about library outputs from the perspective of a single day. We are currently visioning a future, routine report to share with you with similar data points. Our hope is to include information about how the library is used and impacts the community formatted in a way that is easy to digest and will be helpful to tell the story of the great work that occurs at your library!

Collection Maintenance Tracking Report May 2019

The Salem Public Library serves the Salem community by providing a broad selection of materials in a variety of formats to meet its users' informational, educational, cultural, and recreational needs. This report provides a snapshot of the library's collection maintenance during the month of May.

Background

The library's collection is carefully and constantly curated using industry-standard tools, national best practicesⁱ and the expertise of professional librarians. Collection maintenance helps create a vibrant, appealing collection that meets the community's needs. This process frees up shelf space for the constant arrival of new materials, makes shelves easier to browse, identifies subject areas that need updating and identifies items in poor condition that need replacing.

This work relies on the judgment of professional librarians, who use industry-standard best practices to make data-driven decisions. *All items are individually reviewed* in order to assess replacement and mending needs, and multiple data points are used in decision-making, including knowledge of the community and its needs. *Every area of the collection is treated individually with its own criteria.* For example, publication date is a data point that generates item lists for review in the subject areas of health and technology, but is not used in the subject area of literature.

Collection maintenance is an important part of the ongoing, systematic process that encompasses the life cycle of library materials. With the upcoming renovation project, it is especially important to complete a review of the entire collection before the library moves to its interim facility. Doing so now will help avoid the need to store items that are in poor condition or outdated.

Process

During the month of May, staff documented all collection maintenance decisions. Librarians were tasked with evaluating specific portions of their assigned collections. Librarians initially identified items to review using two main criteria— condition and last use date. These criteria were determined by Salem Public Library's condition guidelines and the CREW Manual. The CREW Manual is an industry-standard collection maintenance method. Librarians generated review lists using CollectionHQ, the library's collection management tool, which retrieves data from the library catalog. While searching for items on the review list, librarians also looked for items in poor condition or that met other CREW Manual criteria.

Items were reviewed one by one and manually entered into a tracking spreadsheet. The spreadsheet collected specific data about the items identified for review, such as if the item was reviewed and returned to the shelf, if it was sent to be mended, or if it was withdrawn and why. Items were withdrawn for one or more of the following reasons: excess copy, poor condition, lack of use, outdated content, or another factor specified in the CREW Manual. Librarians also indicated in the spreadsheet if a replacement was purchased or if additional copies of the item remain in the library's collection. Finally, librarians were encouraged to give further information detailing their decisions in a note field.

The following notes exemplify the professional evaluation each and every item received in the during review, and demonstrate the nuanced and complex reasoning that informs the collection maintenance process.

- *Japanese homes and their surroundings* by Edward S. Morse. Withdrawn. Published in 1961. Presents information as current when it is not. Ordered a new edition with an introduction placing the information in historical context.
- *Northwest originals: Oregon women and their art*. Retained. Published in 1989. Recommend moving to Hugh Morrow Collection to make it more accessible to patrons seeking Oregon-specific historical

information. Even though this item has low circulation, it is of local interest and contains information not found elsewhere in the Salem collection.

- *Carpinteria: herramientas - anaqueles - paredes - puertas*. Withdrawn. Published in 1992. Has not circulated in 5 years, has outdated information on building doors, shelving, and walls. For example, the book demonstrates how to make a bookshelf for a nursery but does not describe anchoring it to the wall (to prevent tip-over). There are more current books on building and home projects with safety measures included.
- *More Make It Fast, Cook It Slow*. Replaced. Popular slow cooker author and blogger who has a wide array of beloved cookbooks. This particular copy was in bad shape. The book was sticky, with a bent back cover and water damage. A well-loved and used cookbook! A new copy recently arrived and joined the collection.
- *The Unbroken Web*. Retained. Noticed in poor condition. Hasn't circulated since 2017. Award-winning author of *Watership Down*. Two other works circulating well. Sending for a new cover and repairs (spine starting to split, stains on last page) to refresh.

In accordance with City Council's motion, all adult non-fiction books withdrawn for a reason other than poor condition were placed in storage. For the purpose of this directive, 304 items have been retained.

Detailed tracking results

The following data illustrates the review and decision process staff used during May 2019 to maintain the collection.

Less than 1% percent of items in the collection were identified for review.

- 1,395 items were reviewed by librarians as part of routine collection maintenance.
- 662 items were returned damaged or found in poor condition while shelving ("Snags").

Additionally, 260 magazines were withdrawn as part of regular magazine maintenance.

Outcome of reviewed items

Of items identified for review by librarians, 63% are still available at Salem Public Library.

Collection Maintenance Tracking Report May 2019

Detailed disposition of reviewed items

Of the reviewed items, 22% were withdrawn but were not the last copy, 19% were reviewed and returned to the shelf, 15% were replaced, and 7% were sent to be mended. The remaining 37% were withdrawn.

Withdrawn items by criteria

Of the 37% of items withdrawn during routine collection maintenance, the largest proportion (40%) were withdrawn for more than one reason. 29% were withdrawn due to poor condition, 21% due to lack of use, 7% were withdrawn because they were excess copies, and 3% due to outdated content.

Collection Maintenance Tracking Report May 2019

Snags

“Snags” are items returned damaged or found in poor condition while shelving. Snags are reviewed separately from librarian-driven collection maintenance and are routed to Technical Services for potential mending.

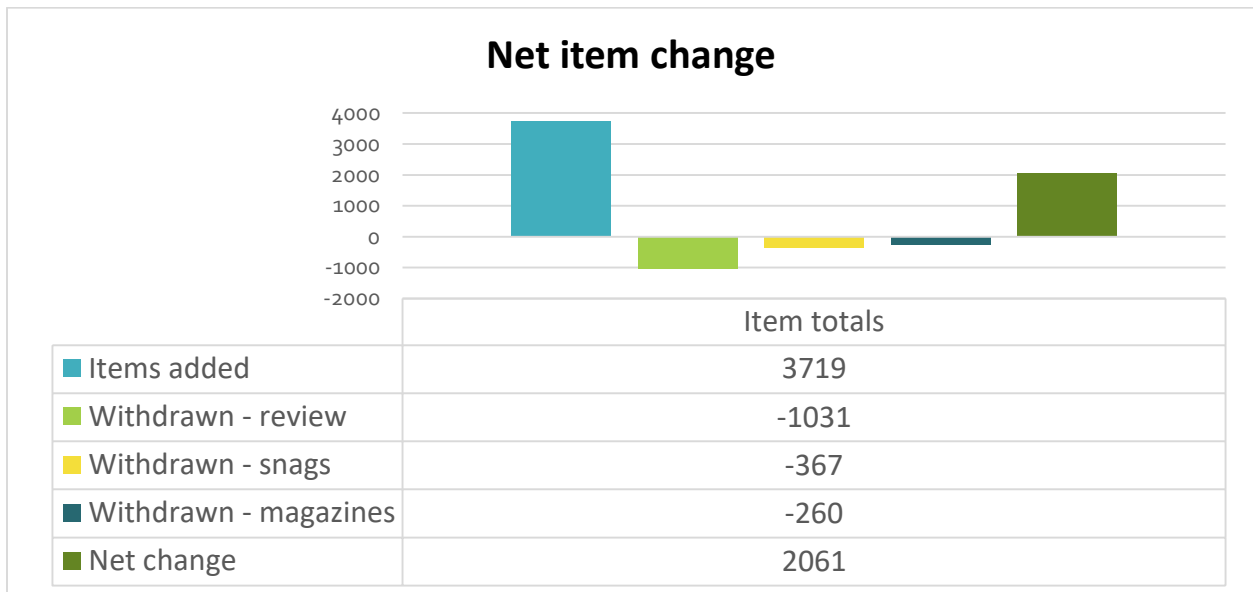

- 662 items were identified as snags.
- 39% were able to be mended.
- 61% were not able to be mended and were withdrawn.

Librarians are notified of withdrawn items so they can determine if they should be replaced.

Net Item Change

The quantity of items added and withdrawn varies from month to month throughout the year. In May, 3,719 items were added to the collection. 1,658 items were withdrawn from the collection during the month of May. This resulted a net change of 2,061 items.

Collection Maintenance Tracking Report May 2019

Conclusion

Librarians work daily to maintain and curate a varied and current collection for Salem Public Library that covers a wide range of subjects and contains multiple points of view. Librarians are responsible for the entire life cycle of collection development, including selection, evaluation, withdrawal, and replacement decisions. This is standard practice in public libraries. The decision to withdraw an item is nuanced - items are not automatically withdrawn due to their presence on a review list. Collection maintenance is careful and thoughtful work, and librarians use a combination of industry standards, national best practices, and professional expertise to evaluate each item and make reasoned decisions on a case-by-case basis.

¹ Industry-standard tools and national best practices used by Salem Public Library include:

- Salem Public Library's [Collection Development Policy](#).
- The [CREW manual](#) (provides criteria regarding condition, use, and currency of content for specific areas of the collection)
- CollectionHQ (generates data including last circulation date, over and understocked subject areas, and [turnover rates](#)).
- Orange Boy community survey data from 2012 and 2018 (community analysis and survey of library use).
- Federal data provided by the Institute of Museum and Library Services, state data provided by the State Library of Oregon and other national data from industry groups such as the Public Library Association, a division of the American Library Association.
