## Summary of work to be done

**Job Location:** 249 Liberty St Ne in the alley (electric alley) due west behind the building

**Job Description:** Installation of a steel security gate in the alcove between bldg. 249 and bldg. 363 as seen in attachment "A". The gate will be constructed from steel tubing both rectangular and square with expanded metal backer to prevent climbing. The height of the gate will be within the city ordinance of 8ft or 96" tall overall height and will swing inward away from the alley. The gate will have a standard keypad lock to enter from the outside (alley side) and handle only on the inside to exit. Gate will powder coated textured black (BK109) to match surrounding materials in the alley. As noted in attachment "B" it may go from a double gate as drawn to one single gate if the posts have to be placed so close together that a double gate wouldn't be practical. Post locations are dependent upon the underground electrical and natural gas lines and will be placed according to clear those utilities. As you can see in attachment "A" the gate structure is COMPLETELY self-supporting via two posts in the ground and is NOT and will NOT be attached to either building for any reason.
